### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/23/06 has been entered. Claims 1-29 are amended for examination.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "the previous interactive component", "remote client"

There is insufficient antecedent basis for this limitation in the claim.

Claim 21 recited, "the multi-episode content" and "the individual content" There is insufficient antecedent basis for this limitation in the claim.

Claims 1-22, 18, 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "remote users (plural form)" and later the applicant recites "the remote client (singular form)". Examiner was not sure that what the applicant is referring to when claimed "remote client". For the purpose of examination, Examiner assumes that when the "remote users" and "the remote client" are the same entity.

Claims 2-22 are depended on claim 1, therefore rejected for the same rationale.

Claims 18 recites "some content is provided to the clients during the event but prior to display during the event" examiner was not sure what applicant mean by this limitation, for the purpose of examination, examiner interprets the above limitation as follow "some content provide to client during the event but prior to display the event".

Claim 23, applicant claimed "interactive content" and later the applicant claimed "content" only, Examiner was not sure that the "interactive content" and "content" are the same one. For the purpose of examination Examiner assumes that they are the same.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 11, 22,24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over latropoulos et al (us 2002/0100039) (hereinafter latro) in view of what was well known in the art.

As regarding claim 11, 24-25 latro discloses the invention substantially as rejected in claims 1 and 23 above, but does not explicitly disclose using icons to representing content.

Official Notice is taken (see MPEP 2144.03) using icons to representing content is well known at the time the invention was made.

It would have been obvious to one of ordinary skill in the art to use icons to represent content, because it would provide user friendliness of graphical user interface.

As regarding claim 22, latro discloses the invention substantially as rejected in claim 1 above, but does not explicitly disclose chat functionality.

Official Notice is taken (see MPEP 2144.03) chat functionality is well known at the time the invention was made.
